ATAL TINKERING LAB INAUGURATION

Date:12/08/22

It was setup at SUPS Banjara Hills and was inaugurated by SUPS Chairman and Honourable Secretary. Mr. Zafar Javed, he appreciated the models made by the students and encouraged the students with motivational Speech.

ATAL SESSIONS BY BIBOX

Session name: Introduction of the 3d printer to students.

Capacity: Nearly 90 students have attended the session.

Mentor: Bibox

The session was conducted in ATAL Lab under the guidance of bibox mentor. Where students were introduced to ATAL lab and working of 3d printer was explained.

The mentor also guided the students participating in the inauguration of ATAL LAB.

Kindly find the attached photos of inauguration and session.

WORKSHOP ON THE WORKING OF HUMANOID AND DRONE.

2)Date:3/11/2022-5/11/22

Venue: Sultan Ul Uloom Public School

Session: Workshop on the working of humanoid and drone.

Capacity: 120 students were trained.

The session was conducted in ATAL LAB under the guidance of Bibox mentor, where 120 Students were trained about the working of Humanoid drone. Importance of AI was shown in the future how technology is going to replace the manual power.

3D PRINTER WORKSHOP FOR MIDDLE SCHOOL.

3)Date:10/12/22

Session:3d printer workshop for middle school.

Venue: Sultan Ul-Uloom public school

The session was conducted by Bibox mentors for middle school students where they learned about the uses of the 3d printer and it's working.

EXPLORE -2022

4)Date:20/12/22-23/12/22

Session: School exhibition

Venue: Ghulam Ahmed auditorium

The students displayed their work in the exhibition, many schools we're invited for the exhibition. Students were displaying the work done in ATAL lab. Appreciation of the work was done by the media.

APPLICATIONS OF ARDUINO SESSION

5) Date:12/01/2023-18/01/2023

Venue: Sultan UI Uloom Public School

Session: Micro Controller and Microprocessor, Applications of Arduino Session Was Conducted in ATAL Lab, Students Were Trained on Microprocessor and Arduino. In this Session the Majority of Students Participated.

Kindly find the attached photos.

APPLICATIONS OF ARDUINO SESSION

6)Date:27/01/2023

Session: Sensors and Arduino

Venue: Sultan Ul Uloom Public School

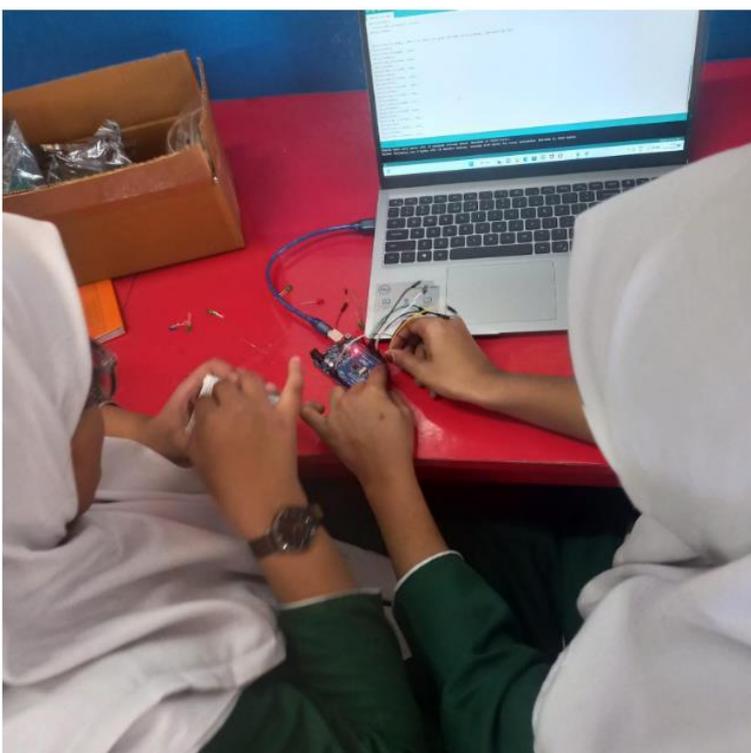

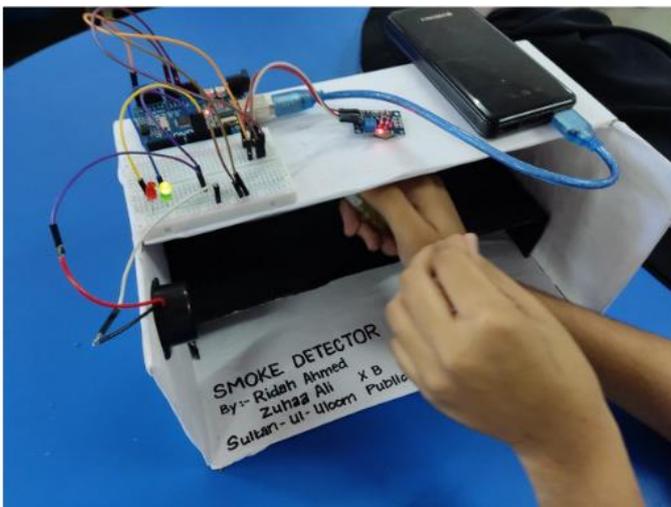

Capacity: 90 students.

The session was conducted in ATAL Lab.

Students were introduced to different sensors and its working.

Students were very enthusiastic in the session as they learned about different sensors and basics of coding on terns.

Kindly find the attached photos of the session

ONLINE MEETING OF ATAL SCHOOL

7)Date: 14/11/2022

Venue: Sultan Ul Uloom Public School

Session: Online meeting of ATAL SCHOOL through zoom.

The session was conducted by the MJ College lecturers, students were trained on the Soldering equipment, and working of DC motors, also students were given information about the different components used in the lab.

ROBOMANIA

8)Date: 20/6/2022-27/06/2022

Session: Robomania

Venue: Sultan Ul Uloom Public School

The session was conducted By Muffakham Jah College of Engineering students. Students were trained on Arduino projects, nearly 200 students participated in the event.

A Robotics workshop is a hands-on learning experience that focuses on teaching participants how to use of various process automation tools and technology in robotics. The workshop typically involves a combination of lectures, demonstrations, and practical exercises that are designed to give participants a comprehensive understanding of robotics.

The workshop typically starts with an introduction to **STEMROBO TECHNOLOGY** and the different types of robots that exist, such as mobile robots, industrial robots, and humanoid robots. Participants may then learn about the various components that make up a robot, such as sensors, actuators, and microcontrollers. By using tools to analyse the process and check whether they can be automated .it does not require any programming skills to configure the software robot. since it is a code free technology any non-technical person can set up the bot using drag and drop features.it is also includes the 'recorder' to record the steps of automation.

After the initial introduction, participants usually have the opportunity to instructed to use a tool like a sensor automatically light on/off LDR or a set of components and LED light on/off sensor. They will be given instructions on how to perform a specific task, such as the difference between micro bit & Arduino that is: the micro: bit generally has more processing power and memory than the Arduino. The main reason you might choose the micro: bit is that its LED display can act as a visual screen in itself and you can interact with it with the buttons on either side.

Throughout the workshop, participants are encouraged to work in teams and share ideas and strategies. They will also have the opportunity to ask questions and receive feedback from the workshop instructors.

By the end, participants will have gained an understanding of robotics and the skills needed to use tools or set of components in robotic, how to access to learn stemrobo. The workshop is invited from stemrobo team to Participated Sultan Ul Uloom Public School IT teachers as: Miss Saba Sayed, Miss Javeria Farheen and Miss Ayesha Nishat.

SULTAN UL-ULOOM PUBLIC SCHOOL BANJARA HILLS PRIMARY SECTION INDEPENDENCE DAY CELEBRATION

Date: 13th August

ORIENTATION PROGRAM FOR TEACHERS

Oxford University Press organised an orientation programme on “INNOVATION IN MATHEMATICS TEACHING” for foundational and preparatory stages was held on 11th Nov2022 at best western ashoka at lakdikapul.

The resource person of the workshop was Miss.Ashalata Badami a well known Mathematics expert and an authoe of Oxford University Press. This workshop was attended by many teachers from different schools.

Ms. Ashalata Badani emphasized on those concepts which were difficult for the students to understand in their primary level. She introduced innovative methods which can be used in the class to make the students enjoy the concepts and make the class lively.

For example, she explained how the operations of Addition, Subtraction, Multiplication and Division can be easily understood if they are taught using place valuse blocks. Also, the concept of factors and multiples can be easily using the colour patterns in the number grid 1 to 100.

We found this workshop very interesting and stimulating as it focused mainly on the concept building and how to engage the students through activity based method. We learnt a nnumber of techniques in making mathematics a joyful learning for the students.

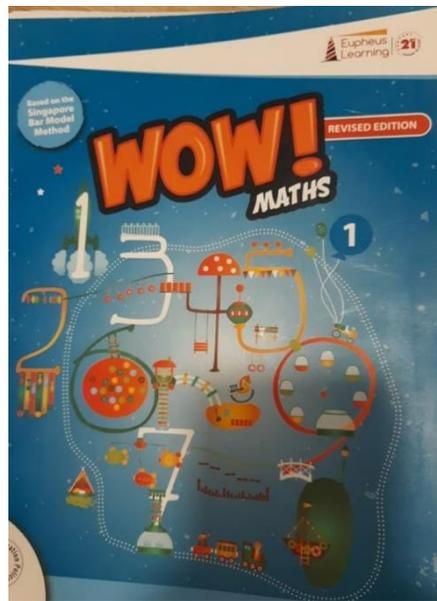

SULTAN UL ULOOM PUBLIC SCHOOL BANJARA HILLS

MAKING MATH FUN. BY SYED F.SATTAR

He Engaged with many activities few for Ist and IInd Classes, and more for III,IV and V classes.

- Adding and subtracting a number line.
- Adding the Percentage Game.
- By Using Bat Model (Shapes)
- Multiplicative Reasoning.
- Grouping and arranging, actively involved in all the games.

SULTAN UL ULOOM PUBLIC SCHOOL BANJARA HILLS

A WORKSHOP REPORT ON EUPHEUS LEARNING

Date: October 29, 2022 Time: 9:30 am to 1:30 pm

Venue: Tourism Plaza, Greenlands, Begumpet, Hyderabad

Topic: Teaching Techniques on LSRW & Phonetics

Resource Person: Dr. Asher Raja Jesudoss

The session on teaching techniques on LSRW was conducted by EUPHEUS LEARNING with a motive to help teachers to skill up their abilities to support the students in acquiring literacy skills.

The main idea was to provide a small group of students or an individual with instructions in which the students skill levels and the needs are best aligned. It has also been taught that speaking skills give us the ability to communicate when we

listen to something repeatedly, then the listener can speak clearly.

With the development of LSRW skills, individuals would be able to communicate and express themselves in a well organised manner.

CONCLUSION

Our Whole Hearted thanks and express to all board members of S.U.E.S Chairman and members of the Governing council and other Honourable Society members for their Guidance and Outstanding Support.

Chairman Governing council

Principal
